

Quarterly Operations Review

1. Overview

Reduce churn among small accounts, expand the partner programme and finish the migration of the remaining legacy services before the end of the financial year. Hiring is on plan, with eleven of fourteen roles filled and the remainder in final interviews. Security completed the annual penetration test with no critical findings and three medium ones, all already scheduled for remediation. The median first reply is now under forty minutes, and the backlog of open tickets has fallen by almost a third since the start of the year.

Revenue grew steadily across all three regions, although the northern region trailed expectations because two large renewals slipped into the following quarter. The median first reply is now under forty minutes, and the backlog of open tickets has fallen by almost a third since the start of the year. Engineering shipped the redesigned onboarding flow, the offline mode for mobile and a long list of smaller fixes. Costs were within two percent of budget, helped by lower cloud spending after the storage clean-up. Reduce churn among small accounts, expand the partner programme and finish the migration of the remaining legacy services before the end of the financial year.

Two incidents affected customers; both were resolved within the agreed window and a full write-up is attached. Partner-sourced revenue reached its highest share yet, driven by the two new reseller agreements signed in March. Looking ahead, the priorities are unchanged. Security completed the annual penetration test with no critical findings and three medium ones, all already scheduled for remediation. A detailed breakdown by team, region and product line follows in the appendix, together with the assumptions behind each forecast. Revenue grew steadily across all three regions, although the northern region trailed expectations because two large renewals slipped into the following quarter.

Customer satisfaction held at 4.6 out of 5 for the third consecutive quarter, with onboarding the most improved area. Partner-sourced revenue reached its highest share yet, driven by the two new reseller agreements signed in March. Looking ahead, the priorities are unchanged.

2. Revenue

Revenue grew steadily across all three regions, although the northern region trailed expectations because two large renewals slipped into the following quarter. Security completed the annual penetration test with no critical findings and three medium ones, all already scheduled for remediation. Revenue grew steadily across all three regions, although the northern region trailed expectations because two large renewals slipped into the following quarter. The board asked for a clearer view of

pipeline coverage, so the next report will include weighted and unweighted figures side by side.
